Subject: NYCOA - WET Testing
Attachments: ATT00001.txt

Hello,

I want to make you aware of a report that you will be receiving through CDX NetDMR. During the week of 9/23/19, NYCOA hired a team to conduct Whole Effluent Toxicity (WET) testing in accordance with our newly updated permit requirements (NH0000116). I want to let you know that the test was performed within the proper timeframe required by the permit; however, the hired contractor made us aware that the results can take up to 30 days. In conclusion, I do not believe we will be able to make the October 15th reporting deadline. I will be sure to have the results and the report in CDX as soon as I receive them.

This had not been an annual requirement in the previous version of our permit, and since the permit was just updated in August, NYCOA needed some time to find and hire the necessary resources to conduct this test. Please let me know if this is acceptable, or if you have any questions.

Thank you,

Jeff Slark
